

This is a guide to the Cedarapids MVP550 Cone Crusher, and the picture is of a brand new model, It is not the actual model that is advertised.

We hope that it gives you more facts about this particular brand of machine, that you may not know about :)

- Cedarapids MVP550,
 - Heavy-duty fabricated steel base frame with replaceable base frame wear liners
 - Hydropneumatic tramp iron relief system
 - Hydraulic thread adjustment system with dual hydraulic adjusting motors
 - Skid mounted manual adjust hydraulic system. Hydraulic thread locking system.
 - Replaceable thread inserts to allow adjustment under load. Rotating bowl for even liner wear.
 - Oversized thrust and radial roller bearings for more load carrying capability
 - Close running deep-grooved labyrinth oil seals. Alloy steel pinion shaft, spiral bevel ring and pinion gears. Replaceable V-seat, replaceable anti-rotation pins
 - Large unobstructed feed opening
 - 2 Hp lube oil pump with safety switch and warning horn
 - Completely self-contained oil reservoir with oil cooling system. Oil immersion heater and thermostat.
 - Interchangeable crushing chambers for coarse and fine crushing. Crusher tools.
 - Automatic Hydraulic Adjustment System (PLC). 15 hp skid mounted hydraulic power unit for crusher adjustment and tramp iron relief system with cable/hose so skid can be mounted 15' from crusher. Includes remote adjust panel on 200' tether with indicator lights, amp meter, position feedback indicator. Automatic Oil Circulation Kit: Automatically circulates oil at a predetermined interval to assist in cold weather start-up (Standard with PLC System).
